Passionate Software Engineer with hands-on experience in back-end and front-end, seeking a position as a Software Engineer to apply my skills and knowledge to contribute to a dynamic development team.

PROFESSIONAL EXPERIENCE

Softdome
Frontend Engineer
Mar 2024 – present
Prishtine, Kosove

- Built a call center management platform to manage appointments, call statuses, and client information, focusing on front-end implementation and collaborating with the backend team. Utilized Next.js, TypeScript, TailwindCSS.
- Developed a large-scale vehicle technical control and management platform for a company, designing the architecture with clean code principles and implementing state management with Pinia. Utilized Vue.js, Pinia, TypeScript, REST API, and Vitest and MSW (Mock Service Worker) for testing.

Starlabs
Full Stack Developer Intern
Jan 2024 – Apr 2024

Worked with React.js, SCSS, and Axios for handling HTTP requests, utilizing Redux for state management on the front end. On the back end, developed with Node.js, TypeScript, and Express.js for handling HTTP requests and MongoDB for data storage. As a full-stack intern for the KosovaHike website, implemented the MERN stack using SCSS, Axios, JWT for authentication, and other modern web technologies.

EDUCATION

Bachelor
University of Prishtina "Hasan Prishtina", Faculty of Mathematical and Natural Sciences, Department of Mathematics, Computer Science Program
Oct 2020 – Dec 2023
Prishtine, Kosove

PROJECTS

Portfolio ☐
Working on my Portfolio with Vue, Typescript and TailwindCSS.

KosovaHike
Implemented with Node/Express Typescript, MongoDB for Backend and React JS, SCSS, and Redux for Frontend.

Atlas Card ☐
Implemented with React JS and SCSS

EDMA GmbH ☐
Implemented with React and SCSS

SneakPeak E-commerce
MERN Stack application

Decision Tree Classification App
Implemented with React and Flask (Python)

Travel Agency Website ☐
Created with HTML, CSS and JavaScript.

Fashionable E-Commerce Website
Created with HTML, CSS, JavaScript, PHP and MySQL.

Distributed Hospital Management System
Implemented with C#.

Pacman Game
Implemented with JAVA programming language.

SKILLS

HTML, CSS, SCSS, JavaScript, Typescript, React JS, Vue JS, Node JS, Express JS, Next JS, TailwindCSS, Redux, Pinia, JAVA, Java Spring Boot, PHP, MySQL, .NET, MongoDB, Python

LANGUAGES

Albanian — Native Language ● **English** — Foreign Language

ACHIEVEMENTS

React JavaScript Programming ☐
BIT Academy
